4-Wheel Drive 4-Wheel Steer Mold & Die Changer

Shown is Green Valley's newest addition, our 4-wheel drive, 4-wheel steer, 25,000 lb capacity quick die changing transporter.

This unit has the ability to maneuver extremely well in confined spaces with the aid of its 4-wheel steering. This unit not only can operate in small spaces but can do so while transporting extremely heavy loads.

25,000 lbs. Capacity

Features:

- Power lift mechanism for variable height die transfer
- High capacity roller deck
- Power mold/die stops
- Power mold/die hooks
- Power insert/extract
- Fully self contained battery power, provides hours of run time without recharging
- Fully automatic on-board charger
- Pendant controlled unit functions
- On-board PLC system management
- Encoder wheel position tracking
- Featuring: crab & counter steer modes
- Variable travel speed from 0-150 FPM
- Robust industrial 24V DC controls
- High durometer urethane load wheels
- (4) 2hp cyclo drive units mounted on high capacity turret style bearings
- On-board DC powered hydraulics for lifting & steering functions
- +/- 1" top deck side shift
- Audio and visual alarms

Options:

- Configured for mold change
- Custom load deck configuration
- Wireless remote control
- AGV controls, automated features
- Battery and charger upgrades
- L. P. gas fueled internal combustion engine power
- Operator ride-on unit
- Load capacity increased or decreased
- Dual Serapid© insert/extract mechanism
- Custom storage systems
