Titan 1293

Mold or Die Change Cart

10,000 lbs. Capacity

The rugged Titan 1293 is GV's high capacity cart with an external tiller drive. Units may be customized for either mold or die tool changing. Decks may be configured for 2 x 5,000 lb. tools for rapid tool change at press. Proven technology and quality components ensure years of service life. A wide variety of storage rack options are also available. Let the custom engineering experts at Green Valley Mfg., Inc. design a system tailored specifically to your requirements.

Features:

- 4hp tiller drive unit
- (4) lane 21/2ø gravity roller deck
- 24" of vertical lift travel
- 60"D x 70"W roller deck
- Power lift mechanism for variable height mold/die transfer
- Battery power provides hours of run time without recharging
- Fully automatic on-board charger
- Pneumatic traction control with on-board compressor
- DC traction motor/cylco drive
- Variable travel speed 0-150 FPM
- Audio alarm
- Robust industrial controls

Options:

- Larger deck size
- Larger lift capacity & stroke
- Larger capacity battery pack
- Power mold/die stops
- Dual Serapid© insert/extract
- Power insert/extract hooks
- Automation/feedback sensors
- Manual back-up hydraulic pump
- Custom storage racks
- Docking mechanisms
