Titan 1004 Mold or Die Changer

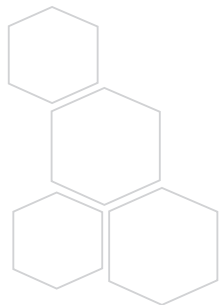

Configured for mold change, this unit was designed for high maneuverability. GV's 2 x 50,000 lb. changer features air film technology and will rotate on its own axis. Dual internal drives provide tank type steering as well as straight line propulsion. Floor loading is very low, compared to wheeled units. This unit also features a 4-point ball screw lift deck for variable press height accommodations, roller slide guided push/pull device, and fully pneumatic power & controls. Extreme tool loads in limited spaces are this unit's specialty.

Options:

Features:

- Air film technology
- Dual internal pneumatic drives
- Fully pneumatic power & controls
- Ultra heavy duty 3/4" wall roller deck
- Powered mold/die stops
- Ball screw insert/extract device with folding arms
