Titan 1005 Mold or Die Changer

Titan
MOLD & DIE HANDLING EQUIPMENT

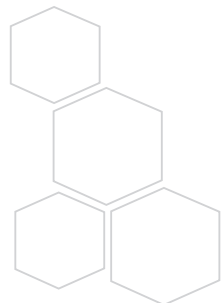

Features:

- Powered lift mechanism for variable height die & mold transfer
- Battery power provides hours of run time without recharging
- Fully automatic charger
- Pendant controlled unit functions
- DC traction motor/cyclo drive
- Variable travel speed from 0-150 FPM
- Robust industrial controls
- Heavy duty roller deck
- High durometer urethane load wheels
- Accordion safety skirting on lift
- Dual position Serapid© insert/extract device

Green Valley Mfg., Inc. has the capability to design mold & die changers of all sizes to meet any manufacturing specification. Shown here is GV's 2 x 8000 lb. capacity mold changer with an optional lift, Serapid© insert/extract, and custom paint. On-board rechargeable DC direct drive allows untethered mobility. A fully automatic battery charger is included that requires only 110V AC power. This transporter is easily controlled by an operator pendant control.

Options:

- Operator ride on platform
- Wireless remote control
- AGV controls
- Increased lift capacity
- Docking mechanism
- Configured for die change
- Powered mold/die stops
- Powered mold/die hooks
- Mold/Die storage rack systems
- L.P. gas fueled internal combustion engine power

16,000 lbs. Capacity
