Titan 1046 Mold or Die Changer

30,000 lbs. Capacity

The unit depicted, a 2 X 15,000-lb mold changer is one of Green Valley's most popular. This mold/die changer can effortlessly transport up to 30,000-lbs and can be configured for 1 or 2 molds or dies. An on-board rechargeable DC direct drive allows you to plug right into the wall for quick, no hassle charging. This transporter is easily controlled and managed by a remote pendant controller. The unit features an optional lift and serapid push/pull device. This changer can meet all your QMC/QDC needs.

Features:

- Powered lift mechanism for variable height die & mold transfer
- Battery power provides hours of run time without recharging
- Fully automatic charger
- Pendant controlled unit functions
- DC traction motor/cyclo drive
- Variable travel speed from 0-150 FPM
- Robust industrial controls
- Heavy duty roller deck
- High durometer urethane load wheels
- Accordion safety skirting on lift
- Dual position insert/extract Serapid© device
- Visual and audio alarms

Options:

- Operator ride on platform
- Wireless remote control
- AGV controls
- Increased lift capacity
- Docking mechanism
- Configured for die change
- Powered mold/die stops
- Powered mold/die hooks
- Mold/Die storage rack systems
- L.P. gas fueled internal combustion engine power
