Titan 1614

Over / Under Die Change Cart
Safely and dramatically increase exchange speed

Titan
MOLD & DIE HANDLING EQUIPMENT

Change dies in minutes safely with the Titan 1614. The over/under design provides die pre-staging capabilities. Operators are able to stage the exchange die at the press prior to extracting the die in the press. Upon extracting the die from the press, the lift is simply lowered and the exchange die inserted.

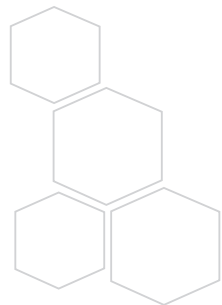

Features:

- Over/under load decks
- Transfer elevation (lower deck) from 12" to 60" above floor
- Transfer elevation (upper deck) from 38" to 86" above floor
- Maximum die dimensions 51" L - R, 28" F - B 22" H
- 650 AH battery, fully automatic charger on-board 120 V AC/24 V DC
- Dual Serapid® push/pull mechanisms, 10 FPM linear speed
- Tiller type drive unit
- 0 - 150 FPM travel speed
- Manual safety die hooks
- Low profile UHMW die slides
- Docking guide roller

Options:

- Custom load decks and transfer heights
- Operator ride - on configuration
- Pendant or wireless remote control
- Automatic guided control (AGV)
- Powered die stops
- Increased battery and charger capacity
- Die storage systems
- Powered die hooks
