Titan 1361

Mold or Die Change Cart with Turntable Deck

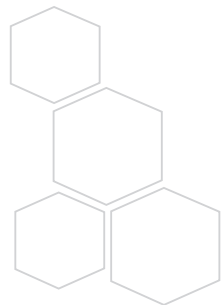

Features:

- Power lift mechanism for variable height mold/die transfer
- Battery power provides hours of run time without recharging
- Fully automatic charger
- Pneumatic traction control with on-board compressor
- DC traction motor/cylco drive
- Variable travel speed 0-150 FPM
- Audio alarm
- Robust industrial controls

The Titan 1361 provides all the same great features as other GVMI carts. The addition of a turntable deck enhances the cart's flexibility. With a turntable deck, tools can be either side or end transferred. A high capacity turret deck and lift provide years of trouble-free service. Manual rotation and tool stops positively retain molds or dies on board. Consult a GVMI applications engineer for additional details.

Options:

- Configured for mold or die change
- Increased deck size
- Increased capacity
- Power Serapid® insert/extract mechanism
- Larger capacity battery pack
- Power mold/die stops
- Power insert/extract hooks
- Automation feedback sensors
- Manual back-up hydraulic pump
- Custom storage racks
- Docking mechanisms

2,400 lbs. Capacity
